

## **SOUTH AYRSHIRE LOCAL CYCLE NETWORKS**

### **South Ayrshire Council - National Transport Award Winner - Walking and Cycling**

In 2007 Transport Planning and Engineering (TP&E) was delighted to find that their continued work for South Ayrshire Council had aided the local authority in winning the

Scottish Transport Award 2007 - Walking and Cycling Award. This award recognised the Council's innovative and exciting work that has led to an extensive number of cycle and walking routes being created in South Ayrshire. The Scottish Transport Awards, which are supported by the Scottish Government, the Scottish Transport Studies Group, Transport Scotland, the Strathclyde Partnership for Transport and Transport Times, acknowledge real improvements to local transport.

TP&E has designed and managed the construction of a number of different cycling and walking routes in South Ayrshire. One of the most notable is the Burton to Alloway path, which the TP&E team re-designed from its original use as a railway line, to form a vital sustainable transport link. An extensive cycle network has also been installed in Ayr, while Girvan residents became the first recipients in Scotland of a complete on/off road cycle network. Other works have included cycle paths on the esplanade at Troon, and designs for projects in Troon and Prestwick.

The TP&E team believe that cyclists need more than just cycle infrastructure, therefore we strive to provide a cycle friendly road environment. Our strong relationships with clients make it possible to deliver a high quality of service. TP&E has completed a number of projects for North Lanarkshire Council, East Dunbartonshire Council and East Renfrewshire Council.

If you would like to know more about the projects or how TP&E can help you reach your sustainable transport goals please contact us on [peterleslie@tpande.org](mailto:peterleslie@tpande.org)
